Ideas you can't live without.

# NEED HELP CHOOSING THE TEFAL LINEN CARE SOLUTION THAT'S RIGHT FOR YOU?

*Allow us to iron out the creases.*

# THE EASY WAY TO PREVENT LIMESCALE BUILD-UP

More than half of UK homes are supplied with hard water. Without an anti-scale solution, limescale will build up inside your iron's steam chamber, clogging your iron. As well as reducing your iron's steam output, this scale can be pushed through the iron's soleplate and stain your clothes.

To tackle this issue, Tefal has developed a unique **Scale Collector**: a patented anti-scale system that prevents limescale build up, ensuring your iron's long-lasting steam power for **effortless crease removal**.

## SCALE COLLECTOR FOR STEAM IRONS:

Removable drawer collects **10X MORE** scale particles directly from the soleplate\*.  
Simply pull out and rinse with tap water.

## SCALE COLLECTOR FOR HIGH PRESSURE STEAM GENERATORS:

Twist-in spoon collects **10X MORE** scale particles directly from the water tank\*.  
Simply pull out and empty the contents in the bin.

\*vs a traditional Tefal iron

# A GOOD-QUALITY SOLEPLATE IS THE KEY TO EFFECTIVE IRONING

The soleplate is one of the most important parts of an iron. This determines how easy it is for you iron your clothes and how long your iron will last. **Here's what to look for:**

## EFFICIENT IRONING

The more holes, the more even the steam distribution

## TIME SAVING

The smoother the glide, the easier and faster it is to iron

## LONG LASTING

The more durable and scratch resistant the material, the longer your iron will last

## LOW MAINTENANCE

The easier it is to clean, the less work there is for you

## SO, HOW DO THE MATERIALS COMPARE? LET'S TAKE A LOOK:

	PTFE NON-STICK	CERAMIC EASY GLIDE	DURILUM	DURILUM AIRGLIDE AUTOCLEAN
STEAM DISTRIBUTION

# WHAT DOES YOUR IRONING WORKLOAD LOOK LIKE?

*Whatever your workload, there's a Tefal linen care solution for you.*

## ESSENTIAL

"I dislike ironing and iron as little as possible."

## FAST & EASY

"I iron large loads on a regular basis for the whole family."

## PROFESSIONAL RESULTS

"I know how to iron and I want excellent results to ensure I look my best."

# What to look for in a STEAM IRON

ESSENTIAL

FAST & EASY

PROFESSIONAL RESULTS

**Steam irons** are ideal for quick ironing sessions. The water tank is built into the iron.

## CORDED OR CORDLESS

Choose a traditional iron or break free with an innovative cordless model

**HIGHER STEAM OUTPUT**  
= SHORTER IRONING TIME

Up to 50g/min

**STEAM SHOT**  
= REMOVES STUBBORN CREASES

Up to 120g/min

**AUTO SHUT-OFF**  
= SAFETY WHILE IRONING

No risk of burning fabrics

**ANTI-DRIP = NO STAINS**

Prevents water drips from steam vents for ultimate garment care

**ANTI-SCALE = LONG-LASTING STEAM POWER**

Scale Collector collects scale directly from the soleplate. Simply pull out and rinse with tap water, prolonging the iron's steam performance for effortless crease removal and maintenance

FAST & EASY

# What to look for in a STEAM GENERATOR

**Steam generators** are ideal for faster ironing and stunning results. They have a separate, larger water tank than a steam iron; a pump leads the water from the tank to the iron. **Steam generators** do not have an integrated boiler to transform water into high pressure steam.

**HIGHER STEAM OUTPUT**  
= SHORTER IRONING TIME  
Up to 100g/min

**STEAM SHOT**  
= REMOVES STUBBORN CREASES  
Up to 180g/min

**AUTO SHUT-OFF**  
= SAFETY WHILE IRONING  
No risk of burning fabrics

**ANTI-SCALE = LONG-LASTING STEAM POWER**  
Filter cartridges prevent limescale build-up, prolonging steam performance and iron life

**LARGER WATER TANK = NO INTERRUPTIONS**  
Larger water tank lets you iron for longer without stopping to refill

FAST & EASY

PROFESSIONAL RESULTS

What to look for in a

# HIGH PRESSURE STEAM GENERATOR

Designed to cut your ironing time in half, **high pressure steam generators** are ideal for professional results, fast. An integrated boiler transforms water into high pressure steam to penetrate fabrics more deeply, removing creases quickly and efficiently.

**HIGHER STEAM OUTPUT**  
= SHORTER IRONING TIME

Up to 120g/min

**STEAM SHOT**  
= REMOVES STUBBORN CREASES

Up to 450g/min

**AUTO SHUT-OFF**  
= SAFETY WHILE IRONING

No risk of burning fabrics

**SMART TECHNOLOGY**  
= OPTIMAL COMBINATION OF TEMPERATURE AND STEAM

One, three or five preset ironing levels ensure the perfect balance of heat and steam for all your ironable fabrics

**CONTINUOUS REFILLING** = MORE EFFICIENT IRONING

Refill the large water tank as you go – no need to turn off the steam generator and wait for it to reheat, so no time is wasted

A child wearing a white raincoat with colorful polka dots and pink rubber boots is walking on a wet, reflective surface. The ground is covered in water droplets, creating a shimmering effect. The child's legs and boots are visible, and the background is a blurred green landscape.
